

xQueueGenericSend

xQueueGenericSendFromISR

prvCopyDataToQueue

```
graph LR; A[xQueueGenericSend] --> C[prvCopyDataToQueue]; B[xQueueGenericSendFromISR] --> C;
```

The diagram illustrates a function call relationship. Two white rectangular boxes on the left, labeled 'xQueueGenericSend' (top) and 'xQueueGenericSendFromISR' (bottom), have blue arrows pointing from their right sides to a single gray rectangular box on the right labeled 'prvCopyDataToQueue'. This indicates that both public functions delegate the task of copying data to the queue to this private function.
